

## Bailey TB Range (8-11 Tonne)

### Description

The 8-11 tonne TB trailers are designed for general-purpose haulage and are the ideal solution for farms, horticultural and contracting businesses that require a compact, dependable workhorse for all those smaller loads.

Built for tough conditions all models are mounted on 8mm RHS chassis, which have been designed to eliminate material spillage onto the road or yard.

Protection against wear and tear is provided by heavy-gauge sides, strengthening channels and heavy-gauge floors with hollow section runners at 300mm centres which feature across the range. Long reach chromed tipping cylinders achieve approximately 50° of tip.

All TB 8-11 tonne trailers feature agricultural axles, fixed drawbar and swing door as standard.
